

Material Data Sheet

Steel Fiber Reinforcement for Concrete

Fiber Type:	ASTM A820 Type V
Product:	CFS 150-5
Length:	1.5"
Aspect Ratio:	38
Tensile Strength:	Exceed requirements of ASTM A820
Specific Gravity:	7.86
Specification:	The steel fiber specified shall be manufactured by Concrete Fiber Solutions and meet the requirements of ASTM A820. The fiber length shall be 1.5" with an aspect ratio of 38. The fibers shall be deformed per ASTM A820. The steel fibers must be clean and free from rust, oil, and deleterious materials. The source should be in compliance under an ISO 9001 quality plan.
Application:	Slab-on-grade Composite steel deck
